XPaths in Selenium

Selenium: Selenium With Java Basics

- **Create Combined XPath** : Associate 2 or more HTML Attribute in Single XPath.
- **text() function** : text() function in xpath helps us to find the element based on the text present in the element.
- text() function is case sensitive in selenium.
- Syntax : //HTMLTag[text()='Value']
- **XPath with Parent Reference** : Design Xpath with Parent, Child combination.
- Syntax: //parentTag[@parentAtt='value']/childTag[@childAtt='value']

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the word 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the index finger and thumb visible, holding the marker. The marker is black with a silver band. The text 'Thank you!' is written in a fluid, cursive style, with the exclamation mark being the final stroke. The background is a plain, light-colored surface.
